

A SHENANDOAH COMPANY

Beneath Every Community, There's a System Worth Protecting

Pro-Pipe helps you see what's underground,
so you can act before failure strikes

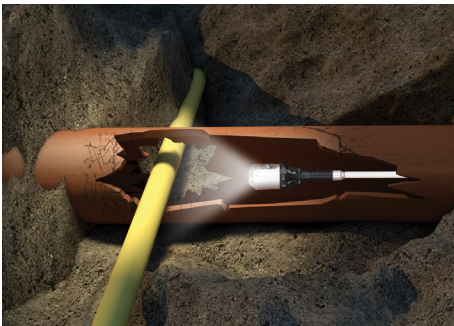

OUR SERVICES

Cross Bore Inspection

Identify and document legacy cross bores to prevent dangerous utility conflicts and ensure safety and compliance from planning to post-construction.

Sewer Pipeline Inspection

Use CCTV and scanning tools to assess system condition in detail, detect issues early, plan targeted repairs, and meet regulatory standards.

Trenchless Repair

Restore damaged pipelines without digging, providing long-lasting structural integrity while minimizing surface disruption, cost, and downtime.

Sewer & Storm Drain Cleaning

Remove debris, roots, and buildup with high-pressure jetting and mechanical cleaning that prepare pipelines for inspection or rehabilitation.

Vacuum Excavation

Our hydro and air vacuum excavation services expose and access buried utilities without damage, ensuring precision and safety in sensitive or congested environments.

Utility Locating

We use advanced locating technologies to accurately identify, map, and mark underground utilities, reducing strike risk and supporting safer project planning and execution.
